Provitus

Life has many flavours!

Homemade recipe unforgettable taste

We are very satisfied from the fact that we represent the food sector which uses the least additives in the chemical industry, such as preservatives, food colouring, flavour enhancers, etc.

In our processing, the vast majority of agricultural products come from Polish producers, which guarantees us freshness.

The principle of the technological process looks the same as in the distant past. New products are often introduced to the market as a result of using old recipes, family stories or the oldest culinary publications.

In our laboratories, we monitor the quality and the taste on an ongoing basis so that they satisfy the palates of consumers.

Our offer includes about 100 products aimed at the Polish market, as well as for consumers from Europe, North America, Australia and New Zealand.

Provitus

Cranberry preserve

A delicious addition to a juicy duck, turkey or goose meat. It also goes well with cold cuts and cheese.

In other words, it is a general-purpose, sweet addition to Christmas dishes and more.

Provitus - Fruit and Vegetable Processing Company.
 We have been on the market for 30 years now.
 We have 10 thousand square meters of production and warehouse space.
 We are an employer to over one hundred employees.

Tadeusz Dąbrowski was the co-founder and mentor of the company.

His knowledge, experience and resourcefulness were fundamental to its development.

The political and economic changes which took place in the late 1980s contributed to the company's development. The founders of Provitus put emphasis on the production of preserves intended for store shelves. The 1990s were the beginnings of modern trading in Poland. During that time many retail chains were opened, and Provitus products were sold to leading trading operators.

Over the last 30 years, we have carefully monitored the market, consumer's attitudes and nutrition trends, which allowed us to introduce about 30 new products that appealed to the tastes and hearts of consumers in Poland and abroad.

Full awareness of changes that take place around us makes it easier to find the answer to the question that every producer asks "What does the consumer need".

Our policy and honest work allowed us to create a strong, recognizable brand, an interesting product offer, and consequently, a very good market position, which provides a solid economic basis for further investments and continuous development of the company.

Thanks to EU subsidies and financing from our own resources, we are constantly expanding and improving our machine park.

Together with our employees, we greatly value the satisfaction of our customers.

PROVITUS, TASTES GOOD!!!
